

How to reduce your dog's carbon paw print

01

Use pickup bags made from organic renewable sources not fossil-based, non renewable.

02

Learn how to identify your country's compostable bag symbol.

03

At home use tongs, scoops, paper or compostable bags.

04

Away from home, pack it out. Use a strong plastic container with a screw on lid & a stick for scooping.

05

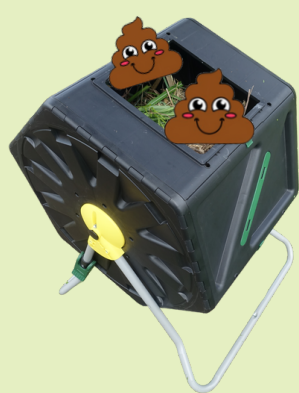

Check with your water treatment plant to see if they have the capacity to accept flushed unbagged dog poop.

06

Check to see if you can put compostable bags & dog poop in your community organics bin

07

Set up your own home compost system for dog poop
